26. **"ATTENTION: INTEREST AMOUNTS ON THE FUNDS IN YOUR ACCOUNT ARE CALCULATED ON THE BASIS OF THE NOMINAL INTEREST RATE. THE ANNUAL INTEREST YIELD SHOWS HOW MUCH INCOME YOU WILL RECEIVE AS A RESULT OF MAKING THE MANDATORY PAYMENTS RELATED TO THE DEPOSIT AND RECEIVING THE INTEREST AMOUNTS EARNED AT A DEFINED PERIODICITY." YOU CAN FIND THE ANNUAL INTEREST YIELD CALCULATION PROCEDURE AT THE FOLLOWING ADDRESS...:"**
27. APY is the annual percentage yield of the deposit calculated for a given deposit type. APY shows how much the annual yield of the deposit will be as a result of the customer making mandatory payments related to the deposit and adding the received interest to the principal amount (capitalization). It is calculated in accordance with the procedure established by the Central Bank of the Republic of Armenia.
28. The annual percentage yield of deposits in case of regular capitalization of interest amounts can be calculated by the following formula:

$$APY = (1 + r/n)^n - 1,$$

where:

APY – annual percentage yield,

r - annual simple interest rate,
n - frequency of compounding of interest during a year.

Example: "Term deposit with monthly capitalization of interest".

Suppose a deposit is offered with the following conditions:

- a. Deposit term: 1 year (365 days)
- b. Annual simple interest rate: 7%
- c. Frequency of interest capitalization: monthly - 12 times a year, at the end of each monthly period.

Based on the conditions of the above example and using the formula, we will obtain the annual percentage yield:

$$APY = (1 + 0.07/12)^{12} - 1$$
, from where:

$$APY = 0.072290 * 100 = 7.23\%$$

- 29. Disputes and disagreements arising between the parties during the term of the Agreement shall be resolved through negotiations.
